250 ltrs / 66 gals

Please note that, based on component availability and other factors, specifications are subject to change without notice.

The weight of each yacht we build varies based on her interior fit-out, materials chosen, hardware and added equipment. All our catamarans are designed for best-in-class weight and sailing performance, without compromising strength or quality.

Undervwing clearance will vary based on the final fit out of the yacht together with what is stored on her, the amount of fuel and water she carries, and the number of passengers onboard.

At sea, you are more yourself.

Balance Catamarans builds a range of semi-production, handcrafted performance sailing catamarans of uncompromising quality, ranging from 42 to 75 feet.

Balance Catamarans is a PA-based LLC with its offices in St. Augustine, Florida and Haverford, Pennsylvania
